SUMMARY

Software Developer with **2.6 years** building **SaaS Platforms**, data-heavy dashboards and cross-platform apps with **React, Next.js, React Native, TypeScript and Node.js**. Owns features end-to-end, from UI and APIs to **CI/CD and Production Monitoring**, using an AI-assisted workflow.

TECHNICAL SKILLS

Frontend & UI: React.js, Next.js, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI, Shadcn UI, Storybook, Responsive Design, PWA
State & Data: TanStack Query, Redux, Context API, React Hook Form
Backend & Databases: Node.js, Express.js, REST APIs, JWT, PostgreSQL, MongoDB, Supabase
Cloud & DevOps: AWS (S3, CloudFront, Amplify), Docker, CI/CD, Sentry, Git/GitHub, NPM, Jira
Testing & Quality: Vitest, Jest, Code Review, Performance Optimization (code-splitting, lazy loading, caching)
AI & Agentic AI: LLM Integration, AI Agents, Prompt Engineering, OpenAI, Gemini, Claude, Cursor

PROFESSIONAL EXPERIENCE

Software Developer – Frontend | Infusyx Services **Jun 2025 – Present**

Education and admissions SaaS platforms: University & Fees Management System, CourseFinder, Application Portal, CRM

- Took **Full Ownership** of the project as the primary developer, responsible for **Design, Development, Deployment, Monitoring and Delivery**, and drove it from requirements to production.
- Built **Multi-tenant** web platforms with **React.js, Next.js and TypeScript**, used daily by **10,000+ students** across universities in **3 Countries**, with **1,000+ Concurrent Sessions** and sub-2-second loads via **code-splitting and lazy loading**.
- Led and built a reusable **Component library** with **Material UI and Shadcn UI**, documented and tested in **Storybook**, eliminating duplicate UI code and speeding up feature delivery across multiple projects.
- Owned the **CI/CD pipeline** end-to-end: **GitHub Actions** workflows with automated tests and rollback-on-failure that made **zero-downtime deployments** the team standard.
- Deployed frontends on **AWS Amplify, S3 and CloudFront** for fast CDN delivery, and added **Sentry** for **live Error Monitoring** and alerting, so production issues are caught and fixed quickly.
- Built an **ERP** platform with **Auto attendance by Face Recognition and RFID card**, delivered as a **PWA** with **Offline Support**.
- Improved data-heavy tables with **limit/offset pagination**, a reusable **DynamicPagination** component and skeleton loaders, and fixed a **race condition**.
- Shipped real-time features, including **Zoom integration for live classes**, **Google Calendar/Meet interview scheduling** and a **live Counselor leaderboard**, now used daily in production.
- Use **AI-assisted Development** (Cursor, Claude, GPT) daily to speed up delivery without losing code quality.

Software Developer – Full Stack (Web & Mobile) | Ioweb3 Technologies **Apr 2024 – May 2025**

HRMS, healthcare, cybersecurity, e-learning (LMS) and ticketing products

- Worked in a **Full-stack role across Web and Mobile**, delivering products end-to-end with **React.js, React Native, Node.js, Express and PostgreSQL**, including role-based applications.
- Built reusable form components (**React Hook Form**), paginated data tables, **TanStack Query** data fetching and a multi-step routing wizard.
- Developed a reusable **support-ticketing widget**, published as an **npm package**, and integrated it into a web app.
- Built **RESTful APIs** with **JWT authentication, RBAC, input validation, rate limiting**, structured error handling and logging.
- Containerized services with **Docker** for consistent local, staging and production environments.
- Built cross-platform mobile apps with **Offline-first** storage (AsyncStorage), background sync, **Firebase Push Notifications** and deep linking.
- Optimized database queries with indexing, cutting API response times under high traffic.

PERSONAL PROJECTS

FormPilot | *React (Vite), TypeScript, Node.js, PostgreSQL, Redis, GitHub Actions* | Live

- Form-management SaaS handling **100+ daily submissions**: JWT auth with refresh tokens, **Redis** caching and rate limiting, webhooks, spam detection, SendGrid email alerts and a real-time analytics dashboard, shipped with **CI/CD**.

TradeX | *Next.js, TypeScript, Zustand, Recharts, PWA, TradingView Lightweight Charts, Supabase* | Live

- Paper-trading simulator for Indian stock and options markets with **real-time option chains**, Greeks (Delta, Theta, Gamma, Vega), lot-based trading and ₹10L virtual capital, with **800ms live price updates**.
- Added an **AI psychology analyzer**, strategy backtester, risk manager with circuit breakers and social leaderboard, delivered as an installable **PWA** with offline support.

MedViz | *React 19, TypeScript, Google Gemini, Supabase, Tailwind CSS | AI/LLM* | Live

- **AI-powered** medical intelligence platform that analyzes **blood reports, radiology scans, ECGs, and health data** using Google Gemini, with multimodal document extraction, personalized health-gap analysis, anatomical visualization, multilingual AI insights, and Gemini-powered voice narration.

EDUCATION

Bachelor in Computer Application (BCA) | D.G.C.C. Satara | CGPA: 8.28/10 **Aug 2020 – Jul 2023**
