PROFESSIONAL SUMMARY

Software Engineer with 2.5+ years of experience building full-stack web and mobile applications across admissions/EdTech, healthcare, HRMS, and CRM/lead-management domains. Proficient in React.js, Next.js, TypeScript, Node.js, TanStack Query, and React Native, with hands-on experience designing data-heavy dashboards, real-time features, and CI/CD pipelines. Known for consolidating messy state management, shipping reusable component systems, and owning features end-to-end from API integration to production polish.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript (ES6+), TypeScript, React, Next.js, React Native, Redux, Zustand, React Query, Tailwind CSS, MUI, shadcn

Backend: Node.js, Express.js, RESTful APIs, GraphQL, Prisma

AI & Agentic AI: LLM Integration, AI Agents, Open AI, Gemini, Claude, Cursor, Prompt Engineering

Data & Infra: MongoDB, PostgreSQL, Supabase, AWS, Docker, Git, GitHub, CI/CD

Practices: Responsive & Accessible UI, Performance Optimization, Code Review, Unit Testing (Vitest & Jest)

PROFESSIONAL EXPERIENCE

Software Developer - Infusyx Services *Jun 2025 – Present*

- Engineered high-performance web applications using React.js, Next.js, and TypeScript, optimized for 1000+ concurrent users with fast uptime and sub-2-second load times via code-splitting, lazy loading, and performance tuning
- Built and maintained CI/CD pipelines with GitHub Actions for automated testing, builds, and zero-downtime deployments, including automated rollback on failure.
- Designed and maintained a scalable, reusable component library using TypeScript, Material UI, and Shadcn UI, establishing design system standards that improved team velocity and code consistency.
- Added real-time features — Google Calendar/Meet interview scheduling and a live counselor leaderboard — that the team now uses every day.
- Found and fixed a tricky data bug that caused wrong information to load on several dashboard pages, then reused the fix across the app so it wouldn't happen again.

Key Projects: *University Management System (Next.js, TypeScript, student portal, faculty management, course scheduling, attendance tracking) | CourseFinder Platform (React.js, search algorithms, filtering, course comparison) | Application Portal (Next.js, multi-step forms, document uploads, application tracking, admin dashboard)*

Software Developer - Ioweb3 Technologies *April 2024 – May 2025*

- Full-stack web and mobile applications using React.js, React Native, Node.js, Express, and PostgreSQL, delivering end-to-end solutions across multiple domains including HRMS, healthcare, cybersecurity, and e-learning.
- Implemented RESTful APIs with Node.js/Express featuring JWT authentication, role-based access control, input validation, rate limiting, and comprehensive error handling with logging.
- Built cross-platform mobile applications with React Native, implementing offline-first, local storage (AsyncStorage), background sync, push notifications (Firebase), and deep linking for seamless UX.
- Optimized database queries with indexing and aggregation pipelines, reducing API response times and improving overall system performance under high traffic.

Key Projects: *HRMS Web & Android App (React.js, React Native, Node.js — employee, attendance, payroll, leave management) | Cybersecurity Web App (React.js — threat detection dashboard, real-time alerts) | Healthcare Web App (Next.js — patient management, appointments, records) | LMS System (React.js — course management, student portal, quizzes)*

PERSONAL PROJECTS

FormPilot -- *React (Vite), TypeScript, Node.js, PostgreSQL, Redis, GitHub Actions, Vercel* *Live*

- Built enterprise-ready form management SaaS handling 100+ daily submissions. Features: Next.js frontend with SSR, Node.js/Express RESTful APIs, PostgreSQL with optimized schemas and indexes, Redis for caching and rate limiting, JWT authentication with refresh tokens, webhook integration system, spam detection algorithms, automated email notifications (SendGrid), real-time analytics dashboard with charts, and complete CI/CD pipeline with automated testing and zero-downtime deployments.

TradeX -- *Next.js, TypeScript, Zustand, Recharts, PWA, Yahoo-Finance, TradingView, Lighweight Charts, Supabase* *Live*

- Built professional paper trading simulator for Indian stock and options markets with real-time option chains, full Greeks calculations (Delta, Theta, Gamma, Vega), lot-based trading, and portfolio management with ₹10L virtual capital. Implemented AI psychology analyzer for trading patterns, strategy backtester, risk manager with circuit breakers, sentiment-based news feed, and social trading leaderboard. Developed as installable PWA with Zustand state management, live charts, 800ms real-time price updates, and offline support.

RailGaadi -- *Next.js 14, TypeScript, MapLibre GL, TanStack Query, Zustand, RailRader, MapTiler* *Live*

- live Indian train-tracking app with an interactive MapLibre route map, 30-second live journey polling, and weather/elevation/terrain overlays sourced from RailRadar, OpenWeather, and OpenTopography, with generated fallback data so the app degrades gracefully when third-party providers are unavailable.

EDUCATION

Bachelor in Computer Application (BCA) | D.G.C.C. Satara *Aug 2020 - July 2023*

CGPA: 8.28/10

Higher Secondary Certificate (HSC) | D.G.C.C. Satara *Jun 2018 - Feb 2020*
